A decrease of £2,535,510 in the value of the commodities to the unfavourable effect of a reduction of £1,023,000, or 6 per cent., represents the reduction in wool. As the falling off in quantity was 70,000,000 lb., or 15 per cent., the wool was worth the preceding year. Of what there was a reduction in the import of £587,000, only 420 tons less were forwarded this year, as compared with 152,000 tons in 1895. A considerable reduction in the import of butter, cheese, and wheat is also noticeable. Copper, tin, leather, and wine are also unfavourable.

How greatly the French Government will be disappointed in this policy we do not know; but we can, at least, be grateful to the Government for letting us have our sugar at their expense."
